

Make It Alright

Jessica Mauboy

It's not every day that you find an angel
Hiding away in a perfect stranger,
Waiting on you
So used to be broken & lied to
Don't push away, it's destined to find you
Cuz they're on their way

Oh
I'm singing cuz I know,
I've been right there before
But then I found the one
Who made me change my mind
He turned my life around,
Pick me up off the ground
Now I'm alive, he makes it alright

Whenever my world stops spinning
Whenever my stars start falling
And every time the winds are blowing,
You can make it stop; you make it alright
Whenever my heart stops beating
And every time I lose that feeling
You, you make it alright
You make it alright (You make it alright)
You make it alright (You make it alright)

So many times you broke down, they hurt you
You never had someone there to save you
But don't give up yet no no
Look at me, I finally got me someone who's there for me
Give it time, you're gonna find someone who's there for you
Trust me the wait is worth it

I'm singing cuz I know,
I've been right there before
But then I found the one
Who made me change my mind
He turned my life around,
Pick me up off the ground
Now I'm alive, you make it alright

Whenever my world stops spinning
Whenever my stars start falling
And every time the winds are blowing,
You can make it stop; you make it alright
Whenever my heart stops beating
And any time I lose that feeling
You, you make it alright (You make it alright)

You keep my ground from shaking all around me,
You're strong, won't let it break
You take my breath away,
And now I'm safe
And there's just no way I could ever live without you
Bring out the very best of me,
The part of me I could never see

Whenever my world stops spinning (world stop spinning)
Whenever my stars start falling
And any time the winds are blowing (any time, any time)
You can make it stop; you make it alright (you make it alright)
Whenever my heart stops beating (my heart, yeah)
And every time I lose that feeling
You, you make it alright
You make it alright (You make it alright)
Mmm You make it alright (You make it alright)
