

## Automotive Engineering

Jethro Tull

In the hands of science  
The complete appliance.  
We're moved to motor.  
Do you fly a Spitfire?  
Do you slide on a tea-tray?  
Or walk on a short trip (Sundays).  
Or drive come what may (enjoy).

Automotive science and engineering.  
When big was better  
And fast was chic,  
The oil was cheaper  
Now we're up the creek.  
But the Japs are coming  
And everyone's turbo'd  
And carbon fiber  
Is the way to go, go.

Down at the robot factory  
Things are humming.  
New radical suspension  
No humans testing.  
(Wind it up, wind it up.)  
Take a trip  
In your Freudian slip.  
Doctor Ferdinand (Ferdie)  
Has you in his grip.
