I've got so much love to give Break it down Some people They don't understand How music can pull up And help rebuild a man It put color where it ain't Put color where others can't Oooh I'm almost there But when I get to you But when I get to you Gonna leave all that old stuff on the floor We're gonna take love higher baby To heights they've never seen before And they gon' say Wooo Cause they can feel it too In every part of the room In a deep full bloom And soon I'm comin' to you baby Baby baby I'm almost there I'm comin' to you
