

# Falling

Jim Cuddy

Walk along with me for just awhile  
This town can beat you down  
It's mile after lonely mile  
With so many faces and unfamiliar places every day

I started out, I came here all alone  
Now win or lose I know I never can go home  
'Cause they'll laugh while they're drinking  
and say what were you thinking anyway

Help me, help me, I think I'm falling  
Down into the hole that I just finished crawling out of  
I'm down on my knees  
I will keep watching  
I will keep waiting to see  
I will keep waiting right here to see

I spent a little time out west  
A year in Calgary  
Tried to go up north, but that was not the job for me  
No I'm made for the city, and it's right here in the city I will be

Help me, help me, I think I'm falling  
Down into the hole that I just finished crawling out of  
I'm down on my knees  
I will keep watching  
I will keep waiting to see  
I will keep waiting right here to see

I met a ballerina in the market by the sea  
She told me it was complicated but she wasn't free  
I said I'm right here beside you if you ever change your mind  
And want to be

Help me, help me, I think I'm falling  
Down into the hole that I just finished crawling out of  
I'm down on my knees  
Waiting til somebody  
Somebody takes the best of me

Help me, help me, I think I'm falling  
Down into the hole that I just finished crawling out of  
I'm down on my knees  
I will keep watching  
I will keep waiting to see  
I will keep waiting right here to see
