

## Looks Like This Is Gonna Be May Day

Jimmy Dean

You've heard me sigh you've seen me cry you've helped to brush  
my tears away  
When things go wrong you're my comfort cause every night you make my day  
Your love and touch can do so much your smile helps me to find  
the way  
Straight to the arms that I live for where every night you make  
my day  
Cause every night you make me happy with all the little things  
you do  
You make my life worth living you make my dreams all come true  
When day is through I think of you and all my troubles slip away  
It's that I long to be near you for every night you make my day  
It's that I long to be near you for every night you make my day
