

# My Best Theory

Jimmy Eat World

It's been a long time, so long  
There's only one life I know (I know)  
But I have my own mind  
I'll say so if it seems right

(Hey rush out)

I see your warm face with the soft mouth  
But it speaks something else (else)  
I'll take my chances with the cast down  
We can feel the air

Rush out, out from the center  
Not like one side is any better  
Stand up as they bend, reaching  
My best theory?  
It's already in me

(We can feel, we can feel the air  
Rush out)

So many questions  
And the answers come back unanswered  
Let's hold the old script  
It's a new twist  
You can feel the air

Rush out, out from the center  
Not like one side is any better  
Stand up as they've been preaching  
My best theory is already in me  
(already in me)

In a lonely real place  
Neither part nor mistake  
Not what you had with your time

My doubt seems fine, my true desire  
My threat, my appetite  
My true desire

I feel the air!

Rush out, out from the center  
Not like one side is any better  
Stand up and escape and breach it  
My best theory is already in me

Rush, out from the center  
Not like one side is any better  
Stand up as they bend, reaching  
My best theory?  
It's already in me

In a lonely, real place  
Neither plan nor mistake  
Love what you have with your time

By dowsing find my true design?  
My flag?  
My appetite?
