

# Close To You

JLS

London, Paris, Tokyo  
Thinkin' of you wherever I go  
When I close my eyes  
You're by my side  
A thousand miles can't keep us apart  
You're tender words serenade my heart  
And you keep me smiling, perfect timing  
I wish that you were here with me tonight

See I travelled all around the world now  
And I've seen so many beautiful girls now  
But somehow, no one ever comes close to you  
You know I've been so many different places  
And I've seen so many pretty faces  
But baby, no one ever comes close to you  
Close to you, close to you

Planes and trains through sudden rain  
Another hotel another daybreak  
And I'm on my way  
I called to say  
I wish that you were here with me tonight

See I travelled around the world now  
And I've seen so many beautiful girls now  
But somehow, no one ever comes close to you  
You know I've been so many different places  
And I've seen so many pretty faces  
But baby, no one ever comes close to you  
Close to you, close to you

And it feels like  
You are always with me  
On these long nights  
Another lonely city  
You are right here, right now  
Cause in my mind I never left at all  
Never left at all

See I travelled around the world now  
And I've seen so many beautiful girls now  
But somehow, no one ever comes close to you  
You know I've been so many different places  
And I've seen so many pretty faces  
But baby, no one ever comes close to you

See I travelled around the world now  
And I've seen so many beautiful girls now  
But somehow, no one ever comes close to you  
You know I've been so many different places  
And I've seen so many pretty faces  
But baby, no one ever comes close to you  
Close to you, close to you

Can you hear me  
Can you hear me  
Close to you, close to you
