## **Outta This World**

Houston We got a problem Said I'm calling Houston We got a problem

Hey Baby out of space, or a far off place She's in front of me I'm standing still Feels like magic, and she has it on me I'm frozen, almost ill

This love of another kind So out there it blew my mind This love of another kind I can never find never find it

She's got me in a trance The way that baby dance And I just wanna hold her body close The look that's in her eyes Has got me mesmerized And where she's coming from nobody knows

She's outta this world She's outta this world She's outta this world world world She's outta this world

Now she's taking me to a galaxy And I can't believe I'm touching her And she has me where there is no gravity And I'm floating up off this earth

This love of another kind So out there it blew my mind This love of another kind I can never find never find it

She's got me in a trance The way that baby dance And I just wanna hold her body close The look that's in her eyes Has got me mesmerized And where she's coming from nobody knows

She's outta this world She's outta this world She's outta this world world world She's outta this world

London, Paris, L.A., Chicago Venus, Mars or Saturn or Pluto Neptune, NY, Jupiter, Toronto Where you from girl Where you from girl London Paris L.A. Chicago Venus Mars or Saturn or Pluto Neptune NY Jupiter Toronto Where you from girl Where you from girl

Tell me where you from Venus, Mars or the sun...
