

## Private

JLS

Let's make this personal, baby, I'm testing you  
'Cause it's about to get out of control  
Just one precaution though  
There's something you should know  
We gotta try to keep it quiet, quiet

'Cause what nobody sees  
They've no reason to believe  
Girl, it should stay between you and me

We should keep it private  
Nobody's got to know  
Keep this thing on the low  
Don't need nobody else  
Just you and me invited

No need to shout it out  
It's not what it's about  
If you can keep a secret  
We can make it private, private, private  
Let's keep it private, private, private

So here's the story now, people are talking loud  
And I'm just trying to keep this under control  
Girl, here's the bottom line  
You can't have love without trust  
So girl, let's keep it quiet, quiet

'Cause what nobody sees  
They've no reason to believe  
Girl, it should stay between you and me

We should keep it private  
Nobody's got to know  
Keep this thing on the low  
Don't need nobody else  
Just you and me invited

No need to shout it out  
It's not what it's about  
If you can keep a secret  
We can make it private, private, private  
Let's keep it private, private, private

Girl, you better believe  
If they try to invade our space  
I promise, I swear on my life  
Gotta fight to protect this  
Forget all the he said, she said  
Keep it private

We should keep it private  
Nobody's got to know  
Keep this thing on the low  
Don't need nobody else  
Just you and me invited

No need to shout it out  
It's not what it's about  
If you can keep a secret  
We can make it private, private, private  
Let's keep it private, private, private

Private, private, private  
Let's keep it private, private, private
