

See no one can predict the weather  
Friendships get lost  
See a legend might live forever  
But what does it cost?  
First you're here and there and then you're gone  
You know that it's your right to be wrong

What happened to the things I wanted?  
I wonder every day  
What do I do if every place is haunted  
With the ghost of my mistakes?  
And all I do is on delay?  
This what I'm thinkin' about [x8]

What happened to the things I wanted?  
It's a lost cause  
See, a legend might live forever without livin' at all  
First you're here and there and then you're gone  
You know that it's your right to be wrong

What happened to the things I wanted?  
I wonder every day  
What do I do if every place is haunted
