## I'm With You

So it's time to set you free Watch you sail away from me Though I'll miss you, when you do I'm with you

Turn your face into the wind Let your greatest dreams begin Take the high road, win or lose I'm with you

I was there in the morning light With a love that would last And I'll be there on your darkest night When the sun's long gone and your heart is sinking fast

When you stumble, when you fall When they back you to the wall After all the rest are through I'm with you

So it's time to set you free Watch you sail away from me Though I'll miss you when you do I'm with you

Take the high road, win or lose I'm with you
