

## Little Wild One

Joan Osborne

Let's keep it simple, just for fun  
Don't speak of this to anyone  
I've seen the way you look in my eyes  
I know that you're ready to fly  
I put my cards out on the table  
You know I'm willing, I know you're able  
Stars are out, the night is young  
Little wild one

I need you like the air that I breathe  
I need you like the sky and the trees  
I need you like you wouldn't believe  
I need you like the sun  
Little wild one

I've thrown away all my defenses  
No way of knowing what the end is  
I'll make it simple, I'll take it slow  
It's there if you're ready to go  
If you are hurting I wanna heal it  
I'll be your heaven, oh can't you feel it  
The fire's burning, the time has come  
Little wild one

I need you like the air that I breathe  
I need you like the sky and the trees  
I need you like you wouldn't believe  
I need you like the sun  
Little wild one

I need you like the heavens above  
I need you like the one that I love  
For all you are and all you'll become  
I love you like the sun  
Little wild one  
Little wild one
