Sick in Love

Joe Bonamassa

I should be medicated, I'm debilitated There's nothing I can do Put me where they find 'em, deep in some asylum Let me forget about you I'm absolutely, positively, sick in love with you Here's the situation, I need an operation

Bring me a doctor and a nurse Give me anesthetic, isn't this pathetic? They are telling me it could be worse I'm absolutely, positively, sick in love with you I'm absolutely, positively, sick in love with you, sick in love

All my friends said to leave her It's too late, I got the fever My brother said, "Forget her now" But they never met her And after all this time, this ain't getting better

Now I can't hack it, I need a straitjacket I love you and I can't stop, I need a pill now I'm truly, truly ill now, any second I will drop I'm absolutely, positively, sick in love with you I'm absolutely, positively, sick in love with you, I'm sick in love

I'm absolutely, positively, sick in love with you Oh, I'm sick in love, baby, oh no, oh, I can't stop, baby
