

## Exxxes

Joe Budden

She be callin my name  
Screamin real loud, I would think she was in pain  
Niggas tried to tell me her head was insane  
Everything she'd do took a toll on my brain  
It seemed a little strange  
She be callin my name

She don't got a name so for now let's call her ashley  
Had her gym clothes on, seen her when she passed me  
Met her up at Exxon, her body was the nicest  
Cursin up a storm, she complainin bout the prices  
She just left Toronto, for Jerz bought a condo  
Know everything about her but we aint never had a convo  
Pops wasnt around much, her mother raised her  
Got so much in common that i dont like to face her  
Her parents is dope heads, she dropped out of school too  
Got the same tat's as me, and i found that unusual  
Mad i smoke cigs said they bad for my own health  
Said she'll never love me, cause i dont love my own self  
Gave me the ass the first night, and I gladly tossed it  
The best part was I aint have to ask for it  
Her period dont ever come in, when i dick her down  
She always runnin but she be callin my name

She like to scream so the neighbors might hear her  
For some reason liked it in front of the mirror  
Let me make it clearer  
She be makin strange requests and I aint talkin bout just pullin her hair  
She be sayin choke me like I lost all respect  
And every time I do a mark show up on my neck  
She say punch her, smack her, like im her attacker  
I say you a fool, she say just do what I asked ya  
I be goin slower till she tell me do it faster  
Every time I'm out with her, niggas just harass her  
I dont understand it, she's so unattractive  
Shorty lookin terrible, plus she come with baggage  
I tap it, though she below my average it deceives me  
She be talkin marriage sayin she'll never leave me  
I say imma bounce but I say I dont believe me  
She fucks me every time she sees me

I be wantin to strangle her, throw her off the balcony  
Dangle her, mangle her, how long have I carried this anger for  
How come when we argue, we gotta get physical  
we crucial conflict, she end up in critical  
Habitual, happens daily like its her ritual  
but show your face bitch, stop bein invisible  
is it just my mental, is she just a symbol  
there for me to look at everything that i resemble  
sometimes during sex i blurt another name  
do that mean i look at me and be ashamed  
of cheatin on me,  
wit a hottie, wit a body who so happen to embody  
everything that i so happen to not be  
I be tryna leave her, but then i get leanient  
since im in this room alone, she becomes convienient.  
then we lie together, cry together, I swear i hope we die together

Look,

I finally grew the balls to tell shorty we should separate  
save your breath, nothin u can do to make me hesitate  
theres no room for me and you to grow  
dont love me, or leave me alone, do both did she  
Apologize for anything that she did  
said without me, she cant think of no reason to live  
said she'll miss gettin piped down  
then she picks up a shank  
i had to tell the crazy bitch to put the knife down  
cryin, eyeshadow on her face, filthy  
feel me, if you kill you, its gonna kill me  
really, she said you neglect me  
i said we the same so, whatever you do is gonna affect me  
you know i cant let it be, naw  
so if we gotta stay together just to co-exist, so it is  
she said i love you, and hugged me, took her pants off,  
and proceded to fuck me.
