

Shooting Star

Joe Perry

No one knows how much time has passed
That i've returned from space at last

A lot of wounds that hurt and bleed
The scars of which you'll never see

My brand new ship is stellar bound
To search out a place i've never found
Where i go only time will tell
There's a lot of space between
Heaven and hell

Chorus:

A million miles away. i don't care what they say
I'll be with you, my love, so from my side don't stray
