

Rain

Joey McIntyre

I wonder how I'll get along
I wonder where I might belong
Losing your way is easy to do
Wandering around without a clue

If there's a way I don't know where
If there's a why I'm standing here
Losing my mind is easy to do
Where are you...

And the rain falls down
It's the only way it gets better
When the rain is fallin' down
Telling me that I'm gonna make it through

I never thought of what it cost
All of the time I might have lost
So much to gain playing it cool
I'm better cast playing the fool

I know I will, but when will I
Stand up to myself, make up my mind
I might not have, what I had before
But I still got the rain

And the rain falls down
It's the only way it gets better
If the rain would fall down
Then I know I could make it through the night

And the rain falls down
It's the only way it gets better
When the rain is falling down
Telling me that I'm gonna make it through

Oh yeah, it's the only way
Oh, ohhhh, it's the only way
Let it rain, let it rain down on me
