We Don't Wanna Come Down

Joey McIntyre

Up here we're one big happy family
Riding around checking out the galaxy
Before we come back down to earth
Ya'll gotta figure out a few things first
One love, one life – ya gotta get it right
Up here I really miss my family
And I wonder what they're gonna think of me
But before we come back down to earth
Ya'll gotta figure out a few things first
One love, one life

We don't wanna come down
Take a good look around
The world's a crazy town
We don't wanna come down
We don't wanna come down
Took a good look around
We like what we found
We don't wanna come down
We don't wanna come down

Oh beautiful for spacious skies
Can you tell me where our future lies
In a world controlled by coke and greed
I wonder how our kids believe in
One love, one life – ya gotta get it right

I do believe l've seen the promised land
And I think it's time we gotta take a stand
From CNN to MTV, gotta tell the world
How it's gonna be
One love, one life...

From so far away the world can look so beautiful
From way up here the universe is magical

From so far away the world can look so beautiful
If you only knew the world is truely magical
