

How Does It Feel

Johan

How does it feel when you turn off your mind?
Doctors and preachers, they're all of a kind
Someday they'll get you, they'll tear you apart
Someway they'll break you, no matter
How fucked up you are

Go with the flow, with the buzz in your head
Know what you know that it's driving you mad
Sometimes you feel like just letting it go
Sometimes there's something inside you that's telling
you no

How does it feel to be out there alone?
Nowhere to run to and nothing to calm you down
How does it feel when you turn out the light?
Can you make it alone?

What good advices, you're wasting your time
Jokers and fakers are walking in line
Sometimes you feel like it tears you apart
Sometimes there's something reminding you, breaking
your heart

How does it feel to be out there alone?
Nowhere to run to and nothing to calm you down
How does it feel when you turn out the light?
Can you make it alone through the night?

How do you sleep at night?
I promise I'll come back tomorrow
No need to follow me
Till I'm found
I'll be around some time

But how does it feel to be out there alone?
Nowhere to run to and nothing to calm you down
How does it feel when you turn out the light?
Can you make it alone through the night?

How does it feel to be out there alone?
Nowhere to run to and nothing to calm you down
How does it feel when you turn out the light?
Can you make it alone through the night?
