

Life On Mars

Johan

His soul is inside another space, a million miles away
from home
Only God knows where I roam
Got no contact with the ground, communications broken
down
And I hope I'll find my way cause there is life on Mars,
they say

Won't you come outside in the sky so bright
Feel the air is clean of things you've never seen
Won't you come down?
Cause there is nothing left to stay for anyway

Here out floating all alone, only truth to be alone
Cruising across the universe, there's no way back, no
reverse
Counting every single moon, I reach my destination soon
Hope my ship knows where to go, cause there is life on
Mars, you know

Won't you come outside in the sky so bright
Feel the air is free of things you've never seen
Won't you come down?
Cause there is nothing left to stay for anyway

Hundred thousand matches in a year I got myself up down
to here
