

Gravel Drive

John Cale

You're going away again
It's almost as if you never came
I'm tired and helpless
and midnight's here
leave me something
something that will make me smile
Someone is calling from the den
"when does survivor come on"
I hear the car door slamming
footsteps on the gravel drive
take me with you
take me away
leave me a piece of your smile
journeys of a lifetime
leaving from here
travelling the edges
like footsteps on a gravel drive
