John Entwistle

Face to face but you're talking long distance Can't stand up but you still try to dance Qualude shuffle, up to my table Two steps back, one step advance.

I can tell by the smile you're trapped in You've been smoking your breakfast again Real life specimen, Space Captain Know where to stop but you don't know when.

Try me, I could be all that you need to get high Try me, I don't promise to teach you to fly Try me, I could be all that you need to get high Try me, I don't promise to teach you to fly.

Life begins at midnight if you're feeling down The white man's talking powder turns you round Powder y'nose don't mean what you suppose In this town it's inside not out.

I can tell by the smile you're trapped in You've been smoking your breakfast again Real life specimen Space Captain Know where to stop but you don't know when.

Try me, I could be all that you need to get high Try me, I don't promise to touch the sky
Try me, I could be all that you need to get high Try me, I don't promise to teach you to fly
Try me, I could be all that you need to get high Try me, I don't promise to teach you to fly
Try me, I could be all that you need to get high Try me, I could be all that you need to get high Try me, become addicted to me
I could be all that you need to get high Try me, I don't promise to touch the sky
Try me, I could be all that you need to get high Try me, I could be all that you need to get high Try me, I don't promise to teach you to fly.
