

Natural Thing

John Fogerty

Well the flower was made for beauty
And the bee was made to sting
All around this world
Honey it's a natural thing

It can shake the high and mighty
Bring a strong man to his knees
All around this world
Honey it's a natural thing

When a man gets up in the morning
He got to find that tiger to tame
All around this world
You know it's a natural thing

But a man alone ain't nothin'
Every Tarzan needs a Jane
All around this world
Honey it's a natural thing

Well the little girls lookin' so pretty
They make a poor man feel like a king
All around this world
Honey it's a natural thing

It drive a man to cross the desert
Or risk his life on a stormy sea
All around this world
Yeah it's a natural thing

Well the flower was made for beauty
And the bee was made to sting
All around this world
Honey it's a natural thing
All around this world
Honey it's a natural thing
