

## Fanfare

John Frusciante

Walk with me through my fanfare  
It'll ease your mind  
Set you fine, my baby  
Stay with me every night  
It'll make you come to where life is never ever done  
Forest green, it'll say so  
You know my heart is in my head  
Cobalt blue, it goes through you  
And cleans the eye of misuse  
Miss you

Stay in tune with the station  
You boarded from  
It's the only thing we hang on to  
Time is the train that never stops  
On it the rhythm you walk's unrelated and of no consequence  
Fire engine red gets into your head  
And will seize opportunities to oppose and defend  
Constant light, it'll burn you  
Destroy the avenue that you stroll happily confused

All my life I've waited for the sun to rise  
All this time  
All this time  
Waiting for the sun and air and shade  
Waiting for the sun and air and shade  
Waiting for the sun to shine  
Waiting for the sun to shine  
And it's you
