

## Ricky

John Frusciante

I was afraid to be me  
Be anyone you want to be  
I don't blame my weak  
For my not being able to speak  
Clearly about things I've said before  
And if it's light outside night will fall, night will fall  
And if it's life it resolves, it resolves

Anywhere you are in a maze is a lie  
Anywhere you are on a page you still go to the right  
Anytime there's no ground below you you're in the sky  
Anytime you're afraid it's gonna be alright, it's gonna be alright

I was a flame in the night  
I heard what I wanted to hear  
And the moment I disappeared  
I grew the size of all outside  
Cause I became one with the night, I became one with the night  
And if it's real it's not all, it's not all there is  
There's alot in what appears not to be there at all  
And you can function as someone besides who you are  
And you can function as someone besides who you are  
And you can function as someone besides who you are  
And you can function as someone besides who you are
