

Come Back Home

John Hiatt

You said you had to go and get your life together
I didn't know you had to go it alone
I guess we all have dreams floating on feathers
I wish you'd come back home

Rugs pulled out and all the curtains have fallen
Been transported to the twilight zone
I don't even have a number I could be calling
I wish you'd come back home

I wish you'd come back home, back where you belong
I know that you're out there, cold and hold up somewhere
I take back every song, all that I've done wrong
I wish that you'd come home to me

Wish you'd come back home, back where you belong
I know that you're out there, cold and hold up somewhere
I take back every song, all that I've done wrong
I wish you'd come home to me

Winter in my mind, my feelings all frozen
Still down Rebel's road and over the stones
Won't be long 'fore the highway start closing
I wish you'd come back home

I wish you'd come back home
Wish you'd come back home
I wish you'd come back home
