Down Around My Place

John Hiatt

The radio is busted, down around my place Every tool is rusted, down around my place Creeks and rivers dried up, down around my place My woman's tears are cried up, down around my place

And before there came a flood Some lost all, even blood Now the sun and wind have come and left no trace Down around my place Down around my place

These hunting grounds were hallowed, down around my place Exhausted fields lay fallow, down around my place Kingdoms come and crumble, down around my place My prayers are merely mumbles, down around my place

And I put my faith in you Did you make that error too? Bound to fail that he might show his grace Down around my place

Down around my place Down around my place

They said you wouldn't believe
What a paradise this was
'Til every Adam and Eve, Tom, Dick and Harry
Started fighting for what he loved

So, we fortified the ramparts
And we built the mighty towers
But it was plain to see, we never were free
From the tyranny of the hour

The family graves keep winkin', down around my place
At every thought I'm thinkin', down around my place
While the young ones crowd the table, down around my place
Bitchin' about no cable, down around my place

And my grandpa says, "Don't worry
It's always the last one in who's in a hurry
To try and slam the door in the next one's face"
Down around my place
Down around my place
