## **Farther Stars**

John Hiatt

Friends of mine they don't hear Clocks ticking all around their ears They don't expect a thing Bridges moving while the river sings

Long lost love Where do we go from here Farther stars Different atmospheres

The river sings us back from the time Drawn to heaven with a voice so fine Final joys final cries On and off like starlight in her eyes

You know your poetry kept me up all night Like you I didn't have the heart to die Still so many things left to say

Long lost love Where do we go from here Death's the truth and death's a lie Love is your only alibis

Mary you'll forget this soon
Where we were and when we sang this tune
Long lost love
