

# Fairy Tale Lullaby

John Martyn

If you want to ride a rainbow, come with me  
And I will take you to the magic purple sea  
Maybe we will find a thousand sugar fish  
When you eat them they will grant your every wish  
And if you want your friends to come  
Then bring them all along.

If you want to catch a star then walk my way  
I will take you where the night is always day  
You can follow me if you really try  
Maybe we will find a rainbow to teach it to fly  
And if you want your friends to come  
Then bring them all along.

I will take you through the magic dancing wood  
And I will take you where the goblins are all good  
I will take you where the elves and pixies do sing  
And I will take you round the magic fairy ring  
And if you want your friends to come  
Then bring them all along.

Bow your head and let your eyelids close on down  
Where we're going you won't need to bring your frown  
You will find that all the things that I have said  
Will come true when you are lying in your bed  
And if you want your friends to come  
Then bring them all along.
