

# When Your Arms Were Around

John Michael Montgomery

I was stone cold convinced  
You were holding me down  
I could chase my wildest dreams  
With you not around  
But I was crazy to think  
That I could hold my own  
'Cause I started to crumble  
The minute you were gone

When your arms were around  
They held my world together  
They kept me safe and sound  
Right through the roughest weather  
Guess I just lost touch  
With the man in me you found  
I was strong as I could be  
When your arms were around

I've done everything  
I said that I would  
But you know somehow the good life  
Don't feel like it should  
So this ladder that I've climbed  
I'd gladly back down  
If I could just have one night  
When your arms were around

When your arms were around  
They held my world together  
They kept me safe and sound  
Right through the roughest weather  
Guess I just lost touch  
With the man in me you found  
I was strong as I could be  
When your arms were around

I was strong as I could be  
When your arms were around
