For No One

John Pizzarelli

I've got a to do list, it's a nothing new list Just the things I need to do today Then you came and passed my way And the things, I'd like to do I'll say

I'd like a lifetime or two for playtime with you I've got a hunch, I'm gonna lunchtime every springtime with you So let's unpack that smile, wisecracking style Batten down in Manhattan town and ransack a while

Let's let our feelings fall as they may Make this hour, our someday We'll never leave the country, oh, we'll just stay inside No need to worry, we've got a great place to hide

Where we could turn off the phone, go it alone Then hijack your hatchback and get accident prone Baby in the meantime, nothing but serene time For no one but you in this lifetime would do
