

You're the One

John Waite

You could be anywhere
But if you think of me
Know that you're on my mind
Got my soul in you hands

No matter what you do
I know it must be right
I'm a man of the world
And I've seen everything

And this time I see one I like
You're the one
That's keeping me wide awake at night
You are

You're the one
And you could be my lucky break
You just might
If you need me at all

Pick up your telephone
I'll be there overnight
Like a puzzle complete
We become as one

How could this not be right
I'm a man of the world
And I've seen everything
And this time I see one I like

Yeah
You're the one
That's keeping me wide awake at night
You are

You're the one
And you could be my lucky break
You just might
And I want the whole world to know

You're the one
You are
You're the one
You are

I'm a man of the world
And I've seen everything
And this time I see one I like
You're the one

That's keeping me wide awake at night
You are
You're the one
And you could be my lucky break

You just might
You're the one

That's keeping me wide awake at night
You are

You're the one
And you could be my lucky break
You just might
Yeah

You're the one
You're the one
You're the one
You're the one
