## I Believe In You

## John Wetton

There comes a time When all you have Can be taken from you, And all your faith can dissolve Into space in no time, but I believe in you

When I look back at all the Mountains we had to climb and Rivers to cross which were Just way too wide to view, I believe in you

And now we still have the best of our lives.....

As years unfold, then I know There will be no other love In my life, I commit and you know it's true I believe in you
