

# These Are My People

Johnny Cash

These are my people this is the land where my forefathers lie  
These are my people in brotherhood we're heirs of a creed to live by  
A creed that proclaims that by loved ones blood stains  
This is my land and these are my people  
These are my people they were born on and lived by the land  
These are my people and their cities were raised by hard working hands  
And their faces to tell that they're holding on well  
To this their land yes these are my people  
These are my people these are the ones who will reach for the stars  
These are my people that a light of the earth you can tell they are ours  
A new step to take and a new day will break  
For this my land yes these are my people these're my people hmmm
