

A Night to Remember

Johnny Mathis

Remember, Remember
The mood is right to take a chance
Put some old records on to play
Soft candlelight and sweet romance
A perfect ending to this day

Tonight's the night to drift away
I'll take you where you want to go
Nothing to say when those songs begin to play
They tell us everything we really need to know

'Cause tonight we'll remember every promise that we made
Every word that's left unspoken in our silent serenade
Cause tonight is forever and forever you'll be mine
So let's make this a night to remember

We lay so still in love's embrace
How could I ever let you go?
Each melody being sung for you and me
Tells us everything we'll ever need to know

'Cause tonight we'll remember every promise that we made
Every word that's left unspoken in our silent serenade
Cause tonight is forever and forever you'll be mine
So let's make this a night

A night to remember what we've had
You know I still get misty when you're near
Just take my hand and we're off to wonderland
Somehow those old love songs always seem to make it clear

That tonight we'll remember every promise that we made
'Cause tonight is forever and forever you'll be mine
So let's make this a night to remember
Every word that's left unspoken in our silent serenade
Cause tonight is forever and forever you'll be mine
So let's make this a night to remember
To remember, to remember, a night to remember
