

I'll Be Easy to Find

Johnny Mathis

I'll be easy to find
When love comes looking for me
I'll stand there with my arms out
So that I'll be easy to see
No hide and seek,
No guessing games will I play
When love comes in to speak my name
I'll say, "Right this way"
The stars may fall from above
The moon may fade out of sight
But angels will be smiling
And my love will light up the night
Though fools may hide their feelings
And tell us love is blind
As for me, I'll be easy to find

No hide and seek,
No guessing games will I play
When love comes in to speak my name
I'll say, "Right this way"
The stars may fall from above
The moon may fade out of sight
But angels will be smiling
And my love will light up the night
Though fools may hide their feelings
And tell us love is blind
As for me, I'll be easy to find
