

Someone

Johnny Mathis

Someone really love you guess who
Someone really needs you guess why
Someone wants to kiss you
And hold you tight
Someone wants to love you each and every night
Someone wants to say hello
I know he'll never let you go

When he looks into your eyes
I know that you will realize
And guess just who that someone must be
I know you'll know that someone is me

Someone wants to kiss you
And hold you tight
Someone wants to love you each and every night

Someone wants to say hello
I know he'll never let you go

When he looks into your eyes
I know that you will realize
And guess just who that someone must be
I know you'll know that someone
I know you'll know that someone is me
