

## Sudden Love

Johnny Mathis

I saw you travellin in the north  
Your smile so clean and young  
Standing tall and green and slender like a sunflower on the sun  
We walked up to each other  
You handed me a flower  
You asked me would I stay with you for a lifetime or an hour  
Sudden love a sudden spark a memory burns  
The fire starts you stopped the dark  
When you came in sight  
You cut the darkness into light  
Then one day it happened love plays its little game  
The air was green with jealousy it was the month of May  
We hired out every extra to even up the cast  
I saw the curtain fallin down right across my past  
Sudden love can fall apart  
When shadows fall across a heart you blew out the flame  
When I turned to part you cut the light into the dark

If it ever comes one is left behind  
Always the let the fact be known love is sometimes kind  
Don't forget about the girl in the long blue dress  
And the man who sang his song  
That day that day when love was blessed  
Sudden love a sudden spark a memory flares up in the stars  
You took the dark when you came in sight  
You cut the darkness into light  
You cut the darkness into light
