## **The Hungry Years**

**Johnny Mathis** 

Girl we made it to the top we went so high we couldn't stop we climbed the ladder leading us nowhere Two of us together building castles in the air We spun so fast we couldn't tell the gold ring from the carousel How could we know the right would turn-out bad Everything we wanted, was everything we had I miss the Hungry Years the once upon a time the lovely long ago we didn't a dime those days of me and you, we lost along the way how could I be so blind not to see the door closing on the World I now hunger for Looking through my tears, I miss the Hungry years We shared our day dreams one by one Making plans was so much fun We set our goals and reached the highest star Things that we were after were much better from afar Here we stand just me and you with everything and nothing too It wasn't worth the price we had to pay Honey take me home Let's go back to yesterday I miss the Hungry Years the once upon a time the lovely long ago we didn't have a dime those days of me and you, we lost along the way how could I be so blind not to see the door closing on the World I now hunger for Looking through my tears, I miss the Hungry years I miss the Hungry Years
