

Your Love Is The Key To It All

Johnny Paycheck

The sun always shines in my world down even when the rain should fall

The light of happiness is always shining and your love is the key to it all

One day you just walked into these arms of mine

Lift me up and with your love made me stand tall

Now I know what happiness in life is all about and your love is the key to it all

Your love is the key that fits every lock to every single door in failure's wall

Now I'm strong enough to do anything I have to and your love is the key to it all

One day you just walked...

Your love is the key to it all
