

Evil on My Mind

Johnny Winter

When I think about my baby
I got evil on my mind
When I think about that woman
I got evil on my mind
It brings teardrops to my eyes
And sends chills all down my spine

It sends chills all down my spine
When I watch that woman walk
Sends chills all down my spine
When I watch that woman walk
But she smiles right in your face
And lie every times she talk

Don't believe that woman

Look out

They say your enemies can't hurt you
If you keep track of your friends
They say your enemies can't hurt you
If you keep track of your friends
I say you better watch your woman
That's the one who threw you in

That's extremely true
