

## Up In The Air

Johnossi

Up in the air, just above the clouds  
Looking out the window  
Oh what a beautiful sight

Up in the air, way above the ground  
Unplug my ears and think  
What a terrible sound

That the engines make, it don't seem right  
Being here it don't make no sense to me  
Although I'm up in the air  
I can go anywhere, up in the air

Up in the air in an old machine  
Black clouds, rain, thunder outside  
What a beautiful sight

Up in the air, cheating on gravity  
But I'm stuck, stuck in this shell of steel  
It ain't place for me

The noise that the engines make  
It don't seem right  
Being here it don't make no sense to me  
Although I'm up in the air  
I can go anywhere, but then I see -

The fine line between space and the atmosphere  
And suddenly everything makes sense to me  
I could go anywhere, without a shell or a care

And when the aeroplane breaks in half  
Just leave your body behind  
Then we could all float around, no run and hide

No worries up there, save the treasure you've found  
It's all yours to keep, in the air - don't be scared
