This ain't the first or last time We'll meet up this late at night To let our fates intertwine Casually I'd rather be Detached from all tragedy This don't need to be defined

And I know that it's wrong
I do, I do
Baby keep holding on
I do, I do
Yeah, I know that it's wrong
I do
When the sun comes up I'll be gone

I only know him in the dark I only know him in the dark

Try to stay desensitized
Keep my feelings out of mind
My body won't be denied
Never took this road before
Love was always out the court
Of anyone I've been with before

And I know that it's wrong
I do, I do
Baby keep holding on
I do
Yeah, I know that it's wrong
I do
When the sun comes up I'll be gone

I only know him in the dark I only know him in the dark

A smile's across your face Your lips a familiar taste Stay focused, I try Can't get this out of my mind I want more than what this is Whatever we're calling this The truth just breaks my heart

I only know him in the dark I only know him in the dark
