

# Shine On Me

Jon Allen

Shine on me darling won't you shine while you can  
While your holding my heart in the palm of your hand  
Oh your love is a shelter but time is a thief  
And forever's a promise that I know you can't keep

Tell me your secrets baby tell me your lies  
Cause you know I believe you when I look in your eyes  
And I'm sure that your leaving's gonna make me feel blue  
But right now I can't think of a better way I could lose

I can't keep the morning from stealing you away  
I can't stops the clock no I can't hold back the day

So won't you shine on me darling while the night is in bloom  
While we're just shadows dancing on the walls of your room  
While the stars are all waiting and the moons riding high  
Won't you shine on me darling dry those tears for your eyes

They say the brightest candle will always burn out fast  
But maybe some things are just to good to last

You can turn a blind eye to all that you feel  
You can put off living with the strength of your will  
But the clock goes on ticking to the beat of your heart  
And sooner or later it's gonna tear you apart
