I fall In the dark I wish I was There with you And you You're probably sleeping I wish I was Sleeping too Next to you Wherever you are I wish you'd fall Back into my arms You Wherever you are You know that we We can't be that far Can't be that far You and me We can't be that far And I I left the whole room Just the wav It used to be With the pictures plastered Higher than the ceiling Trying to keep the feeling alive By trapping it inside You Wherever you are I wish you'd fall Back into my arms You Wherever you are You know that we We can't be that far Cant be that far You and me We cant be that far Cuz your shadow is haunting me And your shadow is all I see Your shadow is haunting me Why won't you Let me be Cuz I'll never have you Wherever you are I wish you'd fall Back into my arms You wherever you are I wish you'd fall Back into my arms Cuz we We can't be that far Away
