

Wish

Jonathan Clay

Wish you were here
Here with me tonight
Wish you were here
Here to make everything right
My world revolves around you
My only grounding source
In all of this confusion
I need you even more
It feels good
Just to close my eyes
Cuz your in my mind
And my mind even brings
Your photograph to life
After a while
In those times that I need you so bad
In those times that I wish that I had
So won't you come here
Here with me tonight
So won't you come here
Come and make everything right
The sugar coating's melted
The loneliness inside
Exposed and unrelenting
Its eating me alive
Do you know
Just how many times
You make me smile
And my mind even brings
Your photograph to life
After a while
In those times that I need you so bad
In those time that I need you so bad
In those times that I wish that I had
In those times that I wish that I had
If I could pick just what I dreamed
I'd do nothing else but sleep
Live the life of a fantasy
Always have you here with me
Live the life of a fantasy
Always have you, here with me
