

Busy Body

Jonezetta

She's the one, she's the one, she's the one for me
I bring her flowers when she starts to feel lonely
Walk around with the new shoes on, oh,
Sit down honey like you know you should

Look at you now on your way out, busy body
Look at you now on your way out, busy body
Your loneliness is all I want from you

Houses on the boulevard
We were watching cars drive by
Street lights, all the street lights
Hold on baby like you know you could
Life without honey, doesn't taste so good

Look at you now on your way out busy body
Look at you now on your way out busy body
Your loneliness is all I want from you

Look at you now on your way out busy body
Look at you now on your way out busy body
Look at you now look at you now you're the only one for me, you
're all I need
Look at you on your way out busy body
Your loneliness is all I want from you
