

# When I Come To You

Jonny Lang

When I'm all alone  
When I'm feelin' blue  
No one understands me, baby  
Nobody but you  
Through all the sleepless nights  
And the rainy day till' the sun is nowhere in view  
The only way I make it through is when I come to you

And in my darkest hour, when the midnight shadows fall  
Baby you got the power to make the angels come to call  
I just hold you in my arms  
And let the music in my heart play the whole night through  
When I come to you, I felt so brand new, when I come to you

When I come to you, you make it all right again  
When I come to you, you keep me from the howlin' wind  
and I feel brand new, when I come to you
