

# One Day We Will Put Out The Sun

Jorn

In the core of the earth a burning fire  
Like the flame in my heart aiming higher  
Bursting with power bound to explode  
Some day the light will go black on the globe

Praying for a master  
Someone who can lead us home  
Falling in disaster  
There'll be no more seeds to grow

On the streets of silence  
Blood from war has dried out  
There'll be no afterburn

One day we will put out the sun  
And drain the sky  
One day and the time will come... Yeahhh  
We'll need no alibi... No no no

Since the beginning of life  
A dark desire  
Controlling the mindfields of man  
Feel the world burn  
The people never learn... Oh yeahhh  
It's such a sad sad melody

On the streets of silence  
Blood from war has dried out  
And there's no return

One day we will put out the sun  
And drain the sky  
One day and the time will come...  
We'll need no alibi... No alibi

On the streets of silence  
Blood from war has dried out  
We're gonna drain the sky

One day we will put out the sun  
And drain the sky  
One day and the time will come... Yeahhh  
We'll need no alibi

One day... Some day  
We'll put out the sun... We'll drain the sky... The sky  
One day... The day will come... We'll need no alibi
