

Young Forever

Jorn

Blessed with thunder
Crowned with rain
Fuelled with fire
As I spit out the flames
I bring you earthquake
I can be blazing
The demon in my soul is aching
To break free
It's the devil in me

Young forever
In my dreams I can never die
Somebody stop the time wheel
Freeze the night sky
So I can remodel history
Before I wake up the world

Search the answer on this stone of pain
Running with strangers
In the shadow of the game
Short is the moment
Cherish the moment that you've been given
Don't let them evil forces lead you on
And bring you down... down

Strong together
In our dreams we can never cry
We wanna slow the time wheel
Seize the day sky

You can remove my fame
Talk bad of my name
But you can't take my spirit
Can't kill the spirit... no

I've played some tricks
But I was mostly fair
I've had my women
But was love ever there
I brought you power
My energy raging
The chain that held my soul
Is now fading
And I'm free, it's the spirit in me... Yeahh

Young forever
In my dreams I can never die
Somebody stop the time wheel
Freeze the night sky
Strong together
In our dreams we can never cry
We wanna slow the time wheel
Seize the day sky
Before I wake up the world
