

# Love You Right

Josh Gracin

My broken heart, and your crying eyes  
Need to sit down, come face to face, and compromise  
It's been a long time since we've been like this  
I'm waving a white flag, yeah and hoping that you'll forgive

Baby, I'm done keeping score  
From now on, I'm completely yours

Well I won't give up, not on your love  
Cause baby, I'm working, working on reading your mind  
And girl, what you need, is just to trust me  
Cause baby what I want, is anything you want, I just want to love you right

But for this to work, we gotta learn from the past  
Strip it all down, to just me and you, cause that's all we'll have  
Baby, I won't waste your time  
And I'll do all I can to make this right

Well I won't give up, not on your love  
Cause baby, I'm working, working on reading your mind  
And girl, what you need, is just to trust me  
Cause baby what I want, is anything you want, I just want to love you right

Well I won't give up, not on your love  
Cause baby, I'm working, working on reading your mind  
And girl, what you need, is just to trust me  
Cause baby what I want, is anything you want  
Baby what I want is anything you want, I just want to love you right
